CAREIT
Food Donation App

Presented By:

**Alyson Schill, CEO and
Co-Founder**

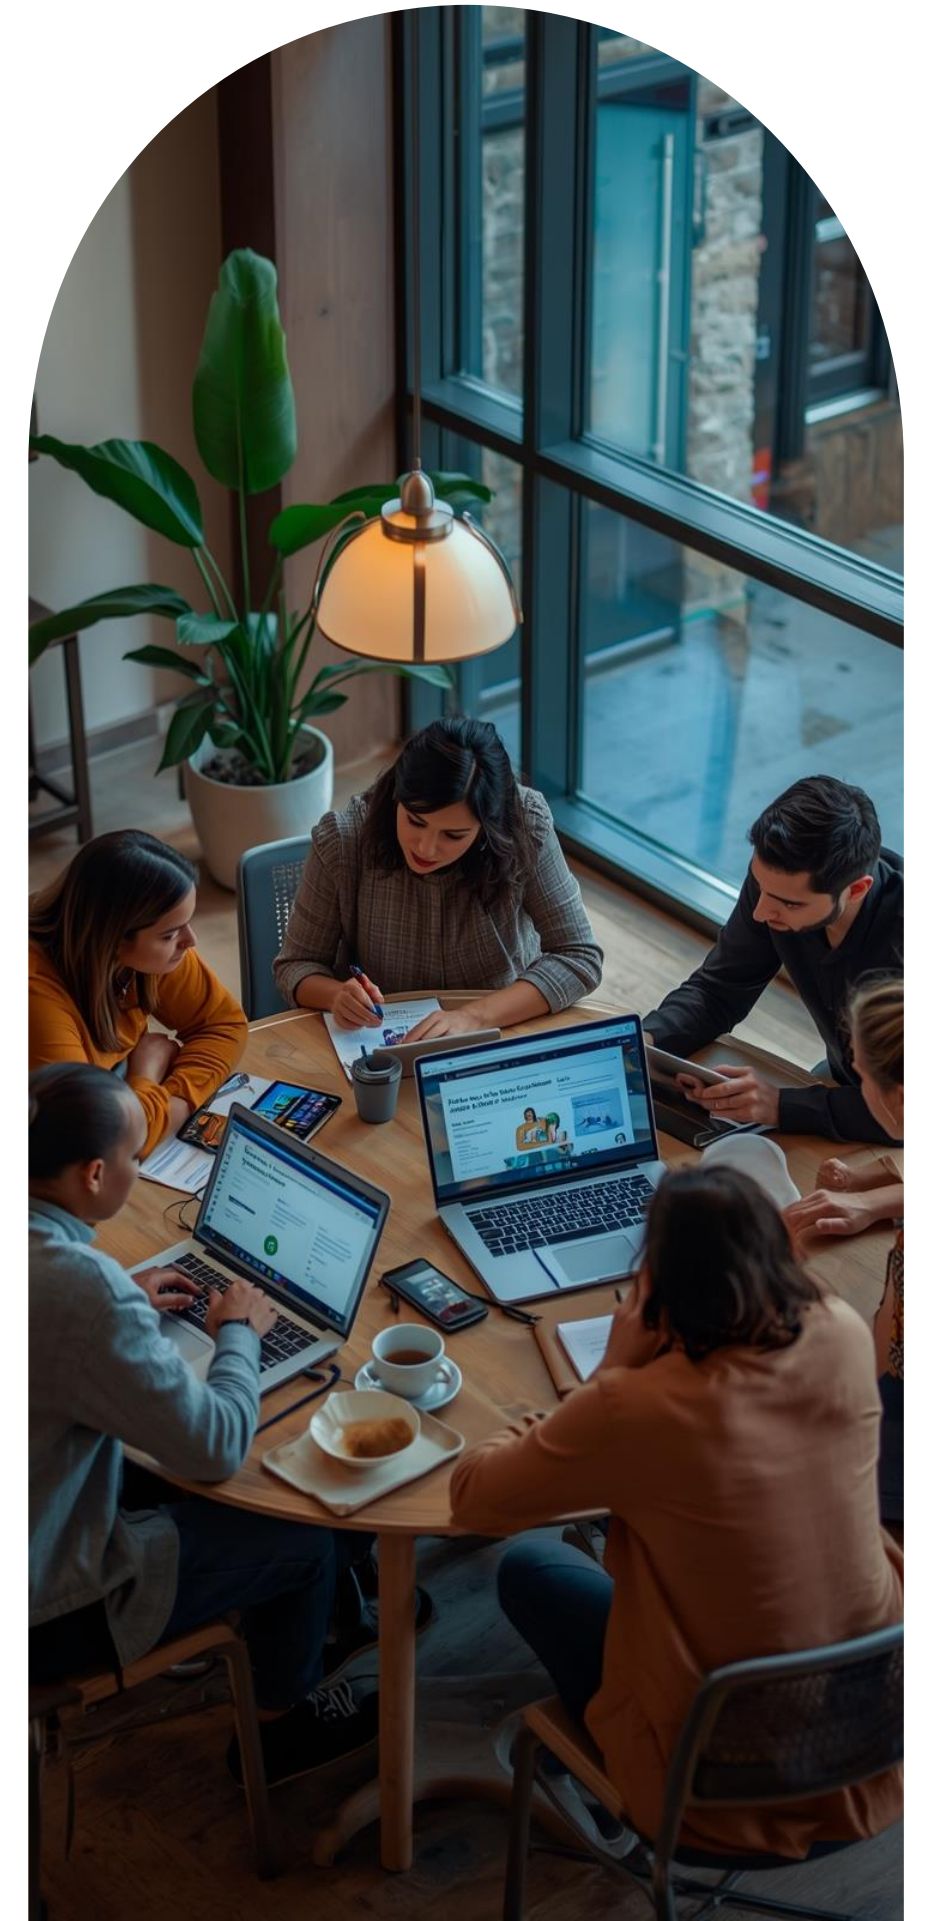

One Platform Total Impact

When donors, nonprofits, drivers, and program managers all work from the same platform, food recovery becomes easier to run and scale.

- **COLLABORATIVE** – Unified Platform for All Stakeholders
- **EASY** – AI-Powered Data Entry in Seconds
- **COST-SAVING** – Built-In Tax Tracking for Businesses
- **TIME-SAVING** – Transparency for Program Managers
- **SCALABLE** – Food Recovery Across Regions

Stakeholders

Corporations: Clear data, partner, and schedule management for all locations

Businesses: Post surplus food and get matched with nearby nonprofits.

Nonprofits: Find and claim food donations, log weights, and track impact for funders.

Food Movers: Replace spreadsheets, schedule pickups, manage drivers, and automate donor reporting.

Municipalities: Streamline food recovery across a geographic area using tools for tracking, implementation, and evaluation.

How Careit Works

Step 1

Businesses snap a photo, AI auto-fills the details, and surplus food is posted in seconds

Step 2

Nearby nonprofits claim it, coordinate convenient pickup times, and assign drivers seamlessly

Step 3

Nonprofits confirm receipt, track weights received, and log temperatures for food safety transparency

Everyone Gets Good Data

All parties receive reports for tax benefits and impact tracking

Business Sense

13,000 donors

Track "Family Meals" or surplus food that staff consume to count towards waste prevention

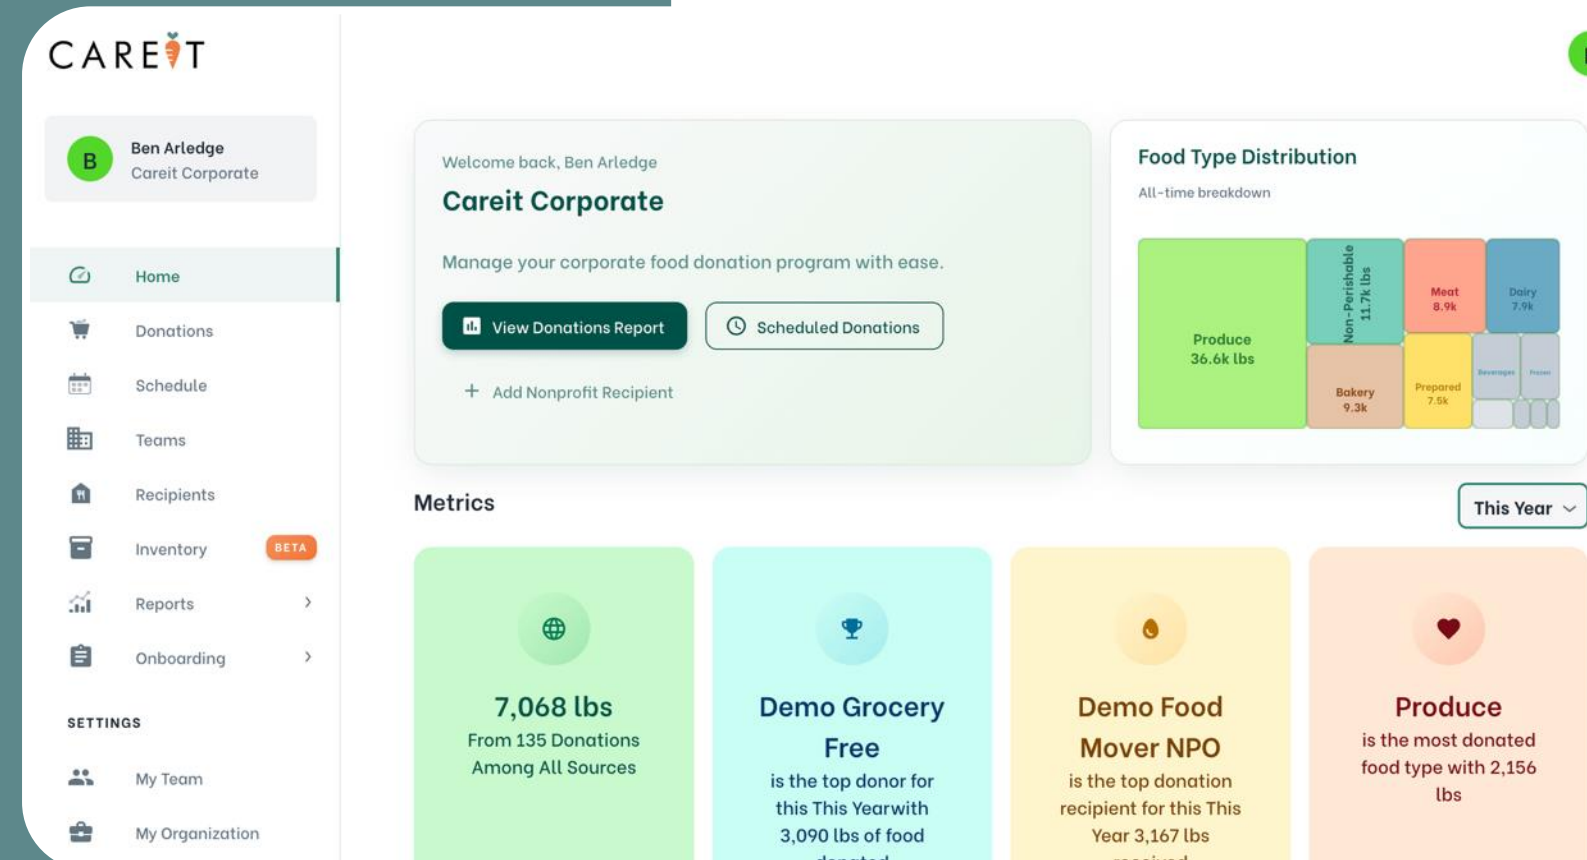

Ingredients turn over from menu changes, nearing expiration, or incorrect orders are donated for a greater tax write-off

Staff morale is boosted, and relationships are built within the community

Communication is streamlined with in-app chat, auto-generated reports, tax letters, and liability agreements

Nonprofits

3,500 Nonprofits

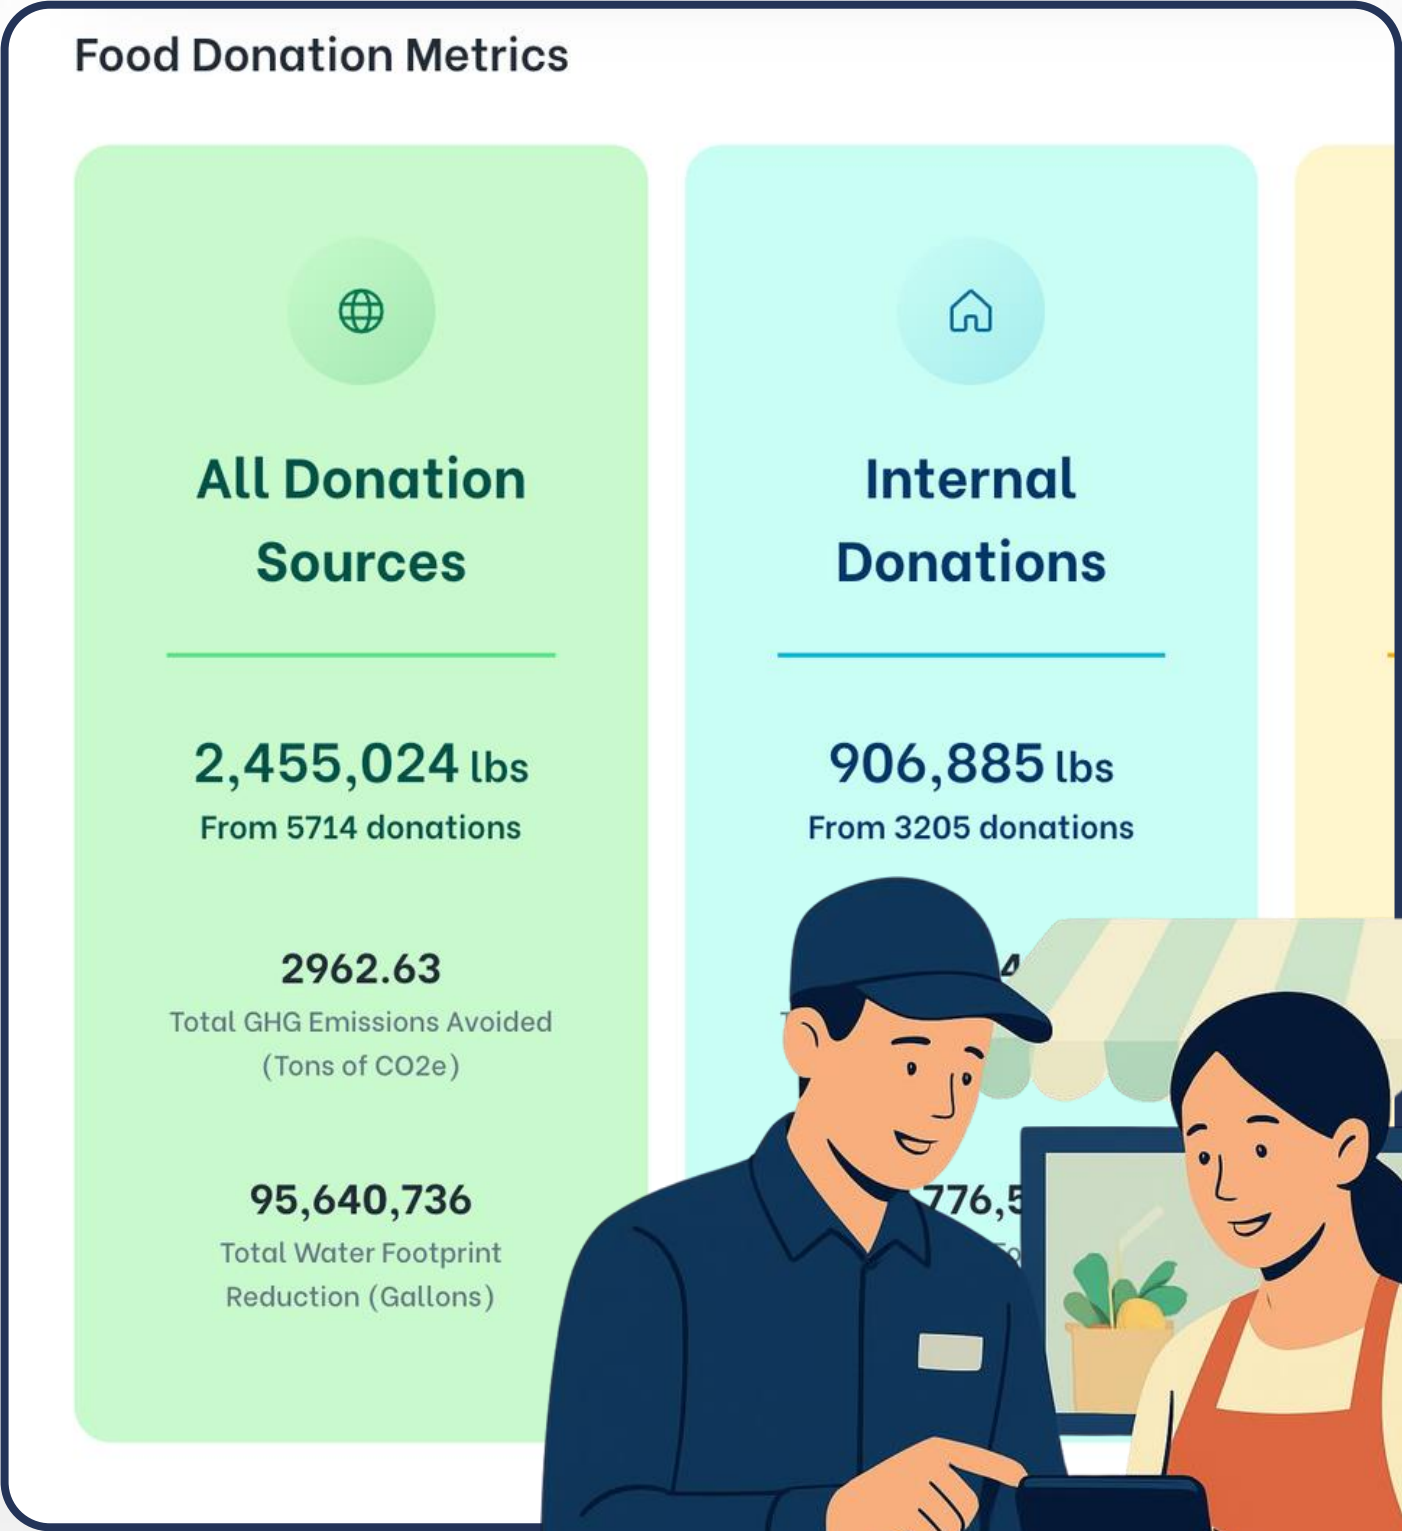

- ✓ Prepared food and ready-made meals are in greater demand
- ✓ Higher quality nutrition/nourish with dignity
- ✓ Direct access and relationship choice: Traditional food banks are slow, picky, and gatekeeping

Municipalities

192 programs

- ✓ Track food recovery across one or more jurisdictions
- ✓ Add data transparency to existing partnerships
- ✓ Tools for implementation and evaluation
